Calculus I-IV  
Linear Algebra

Database Management  
Data Structures

Android App Development  
Apple App Development

## Honors and Awards

---

- Recipient of The *James P. Diskin Scholarship* award at CCP
- Enrolled in the *Phi Theta Kappa* honors program

## Experience

---

- Worked as a Peer Tutor for the advanced classes in CCP from Fall 2023 – Spring 2024. I spoke with and taught students of different ages and demographics. I received mostly positive feedback from the students and faculty.
- Creating and managing a transportation company (LLC). It involved working with various dispatcher companies and various customers in an industrial setting. With my involvement there has been zero late, or miscarried loads.
- Took lead position in a Database Management group project. The goal of which was to create a database for a pet store to manage the employees, pets and customer information. I organized the tasks between the 3 of us via Discord. The project was finished early, and we received an A for the project.
- Created and led the first Math and STEM Clubs in CCP post COVID. This involved communicating with many faculty personnel and time. The clubs created totaled at over 70 members, 10 of which were actively involved and engaging with the community in-person.
- Created initiative and led a study group for very hard classes at CCP. This initiative gave us the ability to pass in the start of COVID restrictions, while others could not make it.

## Skills

---

- Programming: Java, C++, C#, Python, HTML
- Beginner CAD Design and 3D Printing
- Soldering
